Planetary Data System

The Planetary Data System and "PDS Challenge" for tool development

PDS Management

Ed Grayzeck

September 28, 2015

Past NTL interactions

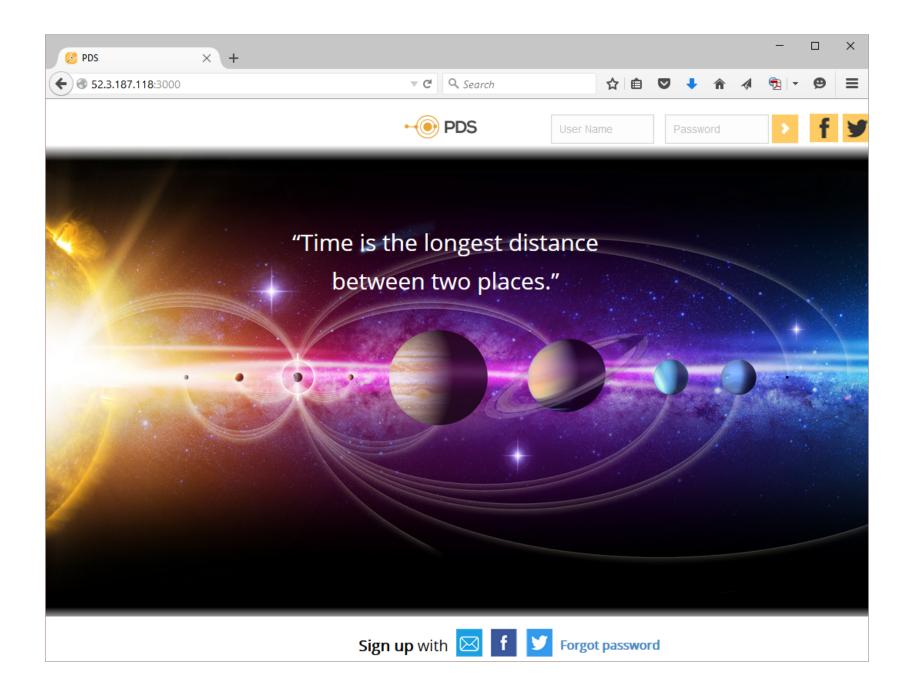

- "PDS Challenge" status as of 2015
 - NASA Tournament Lab(NASA/Harvard/TopCoder) teamed with PSD to implement as NTL action
 - Contests initially supported by NTL via NASA HEOMD (CoECI) and most recently through SMD
 - Used a restricted sample of SBN (comet Halley) start 2012 and presented at Oct 2012 DPS
 - Poster at Oct 2013 DPS including step to form Cassini-Rings (C-R)Challenge
 - C-R workshop and poster at Nov 2014 DPS
 - C-R poster/presentation for Nov 2015 DPS
 - Planetary Data Storyboard abstract at Dec 2015 AGU in NASA SMD special education session

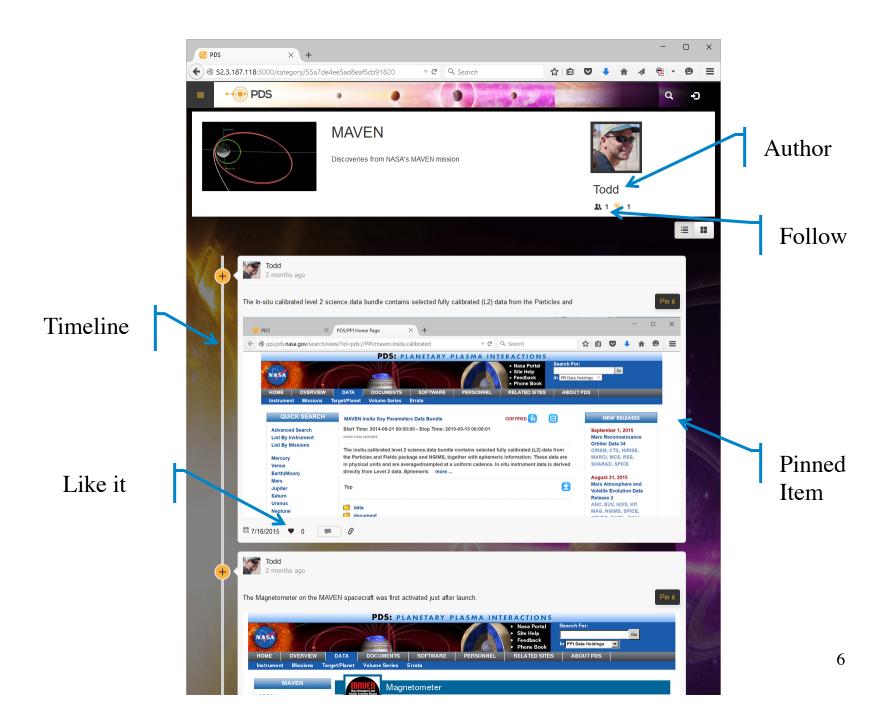

Challenge Cassini - Rings

- 1. NTL Teams to search Cassini ISS data for disruptions citizen science crowd sourcing.
- 2. Set up contests/create scenarios (Oct 13)
- 3. New TC team (3/14) Jen Odess/Ambi Villar
- 4. Set 2 phase Marathon Match (761 "controls")
- 5. Pre 67% success (23 submissions, 9 winners)
- 6. Evaluation by Rings (30K images) identifies needed improvements in efficiency of tool
- 7. "bug races" define fixes to algorithym
- 8. Expect final steps through CoECI contract

Challenge - Storyboard

- 1. PPI Storyboard clone to Pinterest (11/14)
- 2. Proposal from TC/Appirio on hold thru CoECI
- 3. SMD funding for proof-of-concept (5/15)
- 4. Need users to search, tag and like other posts
- 5. Choose existing Myyna site for work
- 6. Restrict First-to-finish and bug races (38)
- 7. Total 154 submissions, 34 unique winners
- 8. URL http://52.3.187.118:3000/

PDS Challenge Next steps

A. TC/Appirio submitted contract end reports

- B. CoECI created a new contract with 10 participating vendors including TC/Appirio.
- C. Funding through CoECI contract is possible but more formal process – propose/review; sole source is an option; SMD support tentative
- D. Current success manager (Jen Odess) now VP which means working with NASA leads up ...

Background

PDS Challenge Initial Steps

- Goal Node input; further access; PDS4 ?
- 1.Identify ideas and interest (Dec 2013);
- 2.About 10 ideas (three different nodes);
- 3. Assemble list Kristen(SMD)/Carol (HEOMD);
- 4. Review planning after Cassini-Rings ends ;
- 5. Previous PDS HQ support to Nodes
 - buy low end server or alternative
 - acquire needed storage space (or cloud)
