R42093: PDS B14.1

Created On	1/6/2024
Completed	No

Passed	Blocked	Untested	Retest	Failed
20% (13/65)	0% (0/65)	78% (51/65)	0% (0/65)	0% (0/65)

Partial Pass	Conditional Pass	Deprecated		
2% (1/65)	0% (0/65)	0% (0/65)		

1. Deep-archive

ID	Title	Assigned To	Status
T7899500	deep-archive#151 Installation instructions don't work on Windows 11		Passed
T8449626	deep-archive#155 pds-deep-registry-archive produces invalid SIPs/AIPs		Passed
T8449627	deep-archive#158 Transfer manifest mismatch between pds-deep-archive and pds-deep-registry-archive		Untested

2. Doi-ui

ID	Title	Assigned To	Status
T7899501	doi-ui#215 When the cognito token is expired, the UI fails and returns a misleading/badly formatted error message		Passed

3. Ds-view

ID	Title	Assigned To	Status
T8081739	ds-view#12 v2.14.2 does not work for resource links		Passed
T8081740	ds-view#3 Upgrade Dataset View and dependencies to support Harvest/Registry upgrades		Passed

4. Feedback-widget

ID	Title	Assigned To	Status
T8449648	feedback-widget#18 Feedback says (CORS) error but submits		Partial Pass

5. Harvest

ID	Title	Assigned To	Status
T8449645	harvest#130 As a user, I want to ingest data products with labels having .lblx file extension		Passed
T8449646	harvest#134 Too many requests error to OpenSearch		Untested
T8449647	harvest#141 A bundle that previously loaded throws an error on reload attempt		Untested

6. Ldd-gen-action

ID	Title	Assigned To	Status
T8681010	ldd-gen-action#7 Submodules execution does not support nested dependencies		Untested

7. Ldd-manager

ID	Title	Assigned To	Status
T8681011	ldd-manager#7 LDD Manager fails when there are nested dependencies		Untested
T8681012	ldd-manager#2 Generate does not fail fast when the ingest ldd file is missing		Untested

8. Mi-label

ID	Title	Assigned To	Status
T8449643	mi-label#64 Executing pds-generate does not output anything		Untested
T8449644	mi-label#46 Jackson-databind vulnerability identified		Untested

9. Pds-api-client

ID	Title	Assigned To	Status
T8449628	pds-api-client#29 product_properties_list() returns None		Passed

10. Pds4-information-model

ID	Title	Assigned To	Status
T8680960	pds4-information-model#733 LDDTool is throwing ERROR SetMasterAttrXMLBaseDataTypeFromDataType - Data Type is missing -		Untested
T8680961	pds4-information-model#738 LDDTool is not creating valid URL for KPLO		Untested

T8680962	pds4-information-model#709 Add KARI as a new agency urn:kari:kpds		Untested
T8680963	pds4-information-model#716 [namespace-registry] update namespace URL for KPDS		Untested
T8739280	pds4-information-model#752 CCB-15: Update Constraints on Author/Editor Lists (JIRA-CCB-356)		Untested
T8739281	pds4-information-model#753 CCB-16: Allow micro amps and nano amps as units of current		Untested

11. Planetary-data-cloud

ID	Title	Assigned To	Status
T8449629	planetary-data-cloud#90 As a user, I want to know how the CSS archive is organized and how users can find the data they need		Untested
T8449630	planetary-data-cloud#91 As a user, I want to know how to use CSS data on AWS		Untested

12. Registry-api

ID	Title	Assigned To	Status
T8449631	registry-api#352 Pagination performance does not meet requirements		Untested
T8449632	registry-api#388 Insufficient scrubbing of user input values prior to logging		Untested
T8449635	registry-api#411 members query return 500 when members do not exist in the registry or alternate_id does not exists		Untested
T8449633	registry-api#387 Cleanup logging of keys		Untested

13. Registry-common

ID	Title	Assigned To	Status
T8681020	registry-common#40 Fix code scanning alerts		Untested

14. Registry-harvest-legacy

ID	Title	Assigned To	Status
T8681171	registry-harvest-legacy#8 As a user, I want to ingest Product_External products into the Registry		Untested

15. Registry-mgr-legacy

ID	Title	Assigned To	Status
T7899504	registry-mgr-legacy#17 Upgrade to latest Solr 9.3.x		Passed

16. Registry-pds3-catalog

ID	Title	Assigned To	Status
T7959250	Registry-pds3-catalog#6 Upgrade to latest Solr 9.3.x		Passed
T8449642	registry-pds3-catalog#4 Upgrade Catalog Tool and dependencies to support Harvest/Registry upgrades		Untested

17. Registry-sweepers

ID	Title	Assigned To	Status

T8449636	registry-sweepers#86 Property values returned by the API are inconsistent, as list or single value.	Passed
T8449637	registry-sweepers#92 Investigate/implement non-redundant provenance processing	Untested
T8681178	registry-sweepers#109 When building registry-sweeper version 1.2.1, docker image 1.3.0 was published on docker hub	Untested
T8681180	registry-sweepers#111 Timeout bug when running legacy dashboard sync	Untested

18. Roundup-action

ID	Title	Assigned To	Status
T8449641	roundup-action#124 Roundup pushes version update prior to completion of execution		Untested

19. Search-ui-legacy

ID	Title	Assigned To	Status
T8449638	search-ui-legacy#7 NullPointerException when wt is not provided		Untested
T8449639	search-ui-legacy#1 Upgrade Keyword Search and dependencies to support Harvest/Registry upgrades		Untested

20. Software-issues-repo

ID	Title	Assigned To	Status
T8449640	software-issues-repo#54 As a user, I want to ensure no		Untested

passwords/secrets are committed to a PDS repo

21. Transform

ID	Title	Assigned To	Status
T7899503	transform#30 [SECURITY] Upgrade to log4j-core/log4j-api		Passed
T8018539	transform#45 Broken download link and Windows JAVA settings in installation docs		Passed
T8018540	transform#46 NoClassDefFoundError exception when transforming XML to PDS3 label		Passed
T8681181	transform#67 Transform failing with java.lang.NoClassDefFoundError on Windows		Untested

22. Validate

ID	Title	Assigned To	Status
T8681182	validate#754 Validate 3.3.0 erroneously reports data objects out of offset order		Untested
T8681183	validate#427 validate does not work correct when path name contains a space on mac		Untested
T8681184	validate#748 Buffer limit IOException thrown with validate-refs		Untested
T8681185	validate#763 Validate.bat does not execute on Windows		Untested
T8681186	validate#739 Intermittent network failures attempting repeated downloads of schemas/schematrons		Untested

T8681187	validate#475 Validate crashes on invalid # of records, and spurious file left behind	Untested
T8681188	validate#432 Requirement #308 does not appear to be working for checking referential integrity from products to others in the bundle	Untested
T8681189	validate#723 Installation instructions need updates for Windows	Untested
T8681190	validate#760 Uncaught exception thrown when only 1 of schemas/schematrons are provided via command-line	Untested
T8681191	validate#761 Validate gives errors for 'NaN' values in IEEE754 data	Untested
T8681192	validate#747 validate flags IEEE 754 "infinity" values as invalid	Untested
T8681194	validate#750 Validate-refs with manifest of file paths does not seem to read the files correctly	Untested
T8681195	validate#681 Validate incorrectly throws precision mismatch error for Table_Delimited	Untested
T8681196	validate#781 Validate making incorrect assumption that first object has and object length == file_size	Untested
T8681197	validate#809 Validate fails to read files on Windows systems after Internal Reference check updates (#308)	Untested
T8681198	validate#785 validate catches valid_maximum but not valid_minimum	Untested
T8681199	validate#308 As a user, I want to check that all Internal References are valid references to other PDS4 products within the current validating bundle	Untested
T8681200	validate#741 As a user, I want validate's referential integrity tool to read a manifest of files and check referential integrity	Untested

| T8681201 | validate#773 As a user, I want validate with the registry when a file is being referenced by more than one label | Untested |
| T8681202 | validate#755 As a user, I want validate to throw an error when a file is being referenced by more than one label | Untested |
