

Dear Document Review Team (DRT):

The Build 9b documents have been revised by the Document Authoring Team (DAT) for v12 release of the information model. Attached please find the Standards Reference, the Data Provider's Handbook, and the Concepts Document. There were no updates for the Concepts Document, a statement was inserted to that effect.

These documents are ready for review. Track changes have been left on. Please provide comments back for consideration by the DWT by COB on Friday, April 26. Please let me know if more time is needed.

Many thanks to the DAT for their effort and getting these ready for Build 9b.

emily
