

Status:	Closed
Project:	PDS4 Standards Change Control Board
Component/s:	Information Model
Affects Version/s:	1.1.0.0
Fix Version/s:	None

Type:	Enhancement / Improvement	Priority:	Normal / Non-urgent
Reporter:	Ronald Joyner	Assignee:	Emily Law
Resolution:	Queued as Software Implementation		
Labels:	Implemented_and_Released		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original Estimate:	Not Specified		

Proposed Solution:	Add a new schematron rule that will validate the values entered into <code>Terminological_Entry.preferred_flag</code> are only 'true' or 'false'.
Dependencies / Contingencies:	None
Additional Information:	None
Working Group:	None
Requested Changes:	<p>The schematron rule to be added follows:</p> <pre> <sch:rule context="pds:Terminological_Entry"> <sch:assert test="if (pds:language) then pds:language = ('English', 'Russian') else true()"> The attribute pds:language must be equal to one of the following values 'English', 'Russian'.</sch:assert> <sch:assert test="pds:preferred_flag = ('true', 'false')"> The attribute pds:preferred_flag must be equal to either 'true' or 'false'. No other values are permitted.</sch:assert> </sch:rule> </pre>
Impact Statement:	<p>Impact:</p> <ul style="list-style-type: none"> -- Information Model -- add schematron rule <p>No Impact:</p>

System Impact:

backwards compatible

Description

Need to add a schematron rule to ensure the values for the attribute 'preferred_flag' are normalized to either 'true' or 'false'.
