Folks -

Yesterday Emily sent me 3 new SCRs for use to consider. Item 202 passed the DDWG with little dissent so it is a clear candidate for an e-vote. The other two had both dissent and some abstentions, indicating that they might be more controversial. There's not enough review time for a telecon on Tuesday of next week. What I propose is that we e-vote on all 3 by next Wednesday (Jan 16). If anyone requests a telecon discussion of any of the 3, we will meet on Tuesday Jan 22 at our normal 08:30 PST time to discuss any or all of the three. E-votes will stand for any of the 3 that does not have a request for telecon discussion, and for members who cast votes but do not attend the discussion.

SCRs to consider:

CCB-202 - Amend the Instrument Class Context Product   PASSED: 9 Yes, 1 No
CCB-214 - Optional trailing zeroes in ASCII_Real for Table_Character   PASSED: 6 Yes, 3 No, 1 Abstain
CCB-247 - Undeprecate "Radio Science" as a Value for Instrument.type   PASSED: 7 Yes, 2 No, 1 Abstain

What I'd like to receive from each of the board members between now and Wednesday is some thing like: "Node (or IPDA) votes CCB-xxx no, CCB-yyy yes, CCB-zzz needs telecon" so I can tell which are to be recorded as e-votes and which need discussion.
