Folks -

The other day Emily sent me a new SCR that needs our vote. Although no vote count was provided, Emily felt that this could be addressed by e-vote. In addition, there is the old "bug-fix" SCR that relates to DOIs. However, despite being a simple error correction, folks feel that we need to vote on it as well since it does impact the data model. If a telecon is needed for discussion of one or more of these items, please make that request to me by Monday, Apr 22 so I can send out the announcement and arrange a telecon/WebEx line. Votes are due by 10 am PDT, Wed Apr 24.

New item:

[CCB-250](#) - Correct schematron rule "pds:Information\_Package\_Component\_Deep\_Archive/pds:checksum\_type" to test for 'MD5' not 'MD5Deep 4.n'

Old item:

[CCB-237](#) Change Attribute doi to Data Type ASCII\_DOI

Back in the day, this bug fix was approved by the DDWG without dissent.

-Steve-
