Folks -

Emily has sent us another SCR to consider and recommends an e-vote. The SCR passed without dissent, although one node was absent. This is an addition of an enumerated value and should not require a lot of effort for us to review. Please review the SCR and send me your vote by 10am Wednesday Aug 12. As always, anyone is free to request a telecon to discuss this change request. If a telecon is requested, we will hold it on Tuesday, Aug 11 at our normal meeting time.

[CCB-294](#) Add enumerated value "HA/pixel" to Units\_of\_Pixel\_Resolution\_Angular

It was passed by DDWG: 9 Yes; 1 not present

The freeze data for the next build is rapidly approaching (8/14). I just want to give everyone a heads-up that the DDWG may send us additional change requests next week that require a quicker than normal turn-around. I'm hoping that if that happens, the changes will be fairly non-controversial - things we can quickly address by e-vote. Hopefully everyone can respond quickly if they know in advance that we're pressed for time.
