Folks -

Just a quick note to let everyone know that the SCR 268 passed the CCB by voice vote without dissent.

-- 20191126: CCB Vote item 268:
-- CCB-268 PASSED: 7 Yes (ATM, GEO, CIS, IPDA, PPI, RMS, SBN);

SCR 138 is referred back to the DDWG for some minor editing before the CCB votes on this change request. Lynn Neakrase and Jesse Stone will assist Lyle Huber with the requested edits. The description of the change request and its purpose should be clarified and Lynn provided good material to support this effort in his JIRA comments. Jesse has requested changes to the "Additional Information" section that describes validation. Jesse has already provided some comments in JIRA but will work with Lyle on the wording for this section.
