

# **Wrap Up Discussion**

**PDS 2010 Tech Session**

**June 11, 2009**

# Next Steps

- Need to prepare for MC meeting (see next chart)
- Need working groups to continue to move towards draft specifications and initial capabilities
- Develop plan to engage data providers and users
- What else?

# MC Meeting

- Splinters?
- What to prepare?
  - High-level design plan for PDS 2010
    - Articulate design benefits of PDS over current practice
    - Compare to other science disciplines
  - Node examples and presentations
  - Design trade offs and recommendations
  - Impact matrix
  - Build/release plan
  - Next steps

# Engaging community

- Engineering can work technical discussions with data providers regarding how to best integrate PDS 2010 into technical infrastructures
  - Recommended Action: SDWG to develop overview materials that can be shared with technical folks from data provider teams
- However, DNs can really help by taking initial PDS4 standards and discussing them
  - Recommended Action: DDWG to develop overview materials that can be shared with customers and advisory teams for input

## Other actions?

- Send comments you want the teams to address to Emily
- What else?
