Hello CCB!

We've got 3 items to vote on this week. I think all three can be handled with an eVote, which should help some of those who may be at DPS next week. Please review the following and return your votes to me by Tuesday morning (10/8/2013) by 8:30am PDT.

CCB-32 Add "ISIS2 History Label" to Header.parsing\_standard\_id

<https://pds-jira.jpl.nasa.gov/browse/CCB-32?jql=>

CCB-37 Add RFC 3629 as Recognized Standard for UTF-8/Unicode\*\*

<https://pds-jira.jpl.nasa.gov/browse/CCB-37?jql=>

CCB-38 Clarify Bundle Version Relationship to Product\_Bundle Version (ditto collections)

<https://pds-jira.jpl.nasa.gov/browse/CCB-38?jql=>

Thanks everyone,

-Lynn

P.S. -- CCB-37 is designated a "bug fix" -- I think the reference here is because the changes listed are for fixes (typos and specifications) to the Standards Reference Documents. Discussion of this issue over email might include whether or not we (the CCB) should be reviewing this type of change or if documents should just be edited outright.
