Hi CCB!

Emily and Triage reports CCB-29 is ready for vote. CCB-29 deals with deprecation of the Display_2D_Image class -- replacement with the Default_Display_Setting. I don't think we need to meet for this single issue.

Please post comments on the JIRA site and hopefully the announcement system will be working for any discussion that comes up.

I'll plan on collecting your votes by Tuesday morning (1/28/2014) at our usual time, 8:30 am PST, with a summary email to be sent out later that morning.

Thanks for your time!

-Lynn
