Ray,
Excellent questions! Perhaps I would add in at sufficient detail so they
can
find the data they need?
Regards,
Ray

Subject: RE: enhanced agenda for Mon, Nov 12, MC telecon

Here are some key questions that Geo will ask during the MC Meeting in New Mexico, and during today's telecon, if given the opportunity.

Most important issues for PDS-4 to address:

1. How will PDS-4 enable "one-stop shopping", i.e., seamless access to data that reside at multiple nodes?
2. How will PDS-4 help users by delivering derived data products in the format, coordinate system, and map projection the user requests?
3. How will PDS-4 help data providers by automating the design, production, and delivery of PDS data sets?
4. How will PDS-4 ensure that PDS standards are simple, straightforward, and consistent so that data providers and users can easily understand and apply them?
5. How will PDS-4 ensure that data sets can be safely and efficiently archived in NSSDC and retrieved on demand?
6. How will PDS-4 improve the data transfer, data integrity, and maintenance of PDS data sets?
